  - Team Project: 5 Members
  - Role: Dijkstra's Algorithm implementation

INTERNSHIP

Visteon, Pune Jan 2024 to Jun 2024

Software Development Intern for Visteon Corporation LTD.

- I had the opportunity to collaborate closely with senior team members to rigorously test the features of the In-Vehicle Infotainment (IVI) system. As an integral member of the Voice Recognition (VR) team, I was deeply involved in various critical phases of the testing process for prominent automotive models including Mahindra 3XO, Tata Punch, and Tata Altroz.
- My responsibilities included creating comprehensive test cases, meticulously identifying and raising defects, and detecting bugs to ensure the highest standards of software quality.
- Additionally, I played a key role in the flashing of new builds, ensuring seamless integration and functionality of the IVI system across different vehicle models. My proactive approach and keen attention to detail significantly contributed to the enhancement of the overall user experience and reliability of the IVI system.

EXTRA-CURRICULARS AND SOFT SKILLS
